Language and data on this device

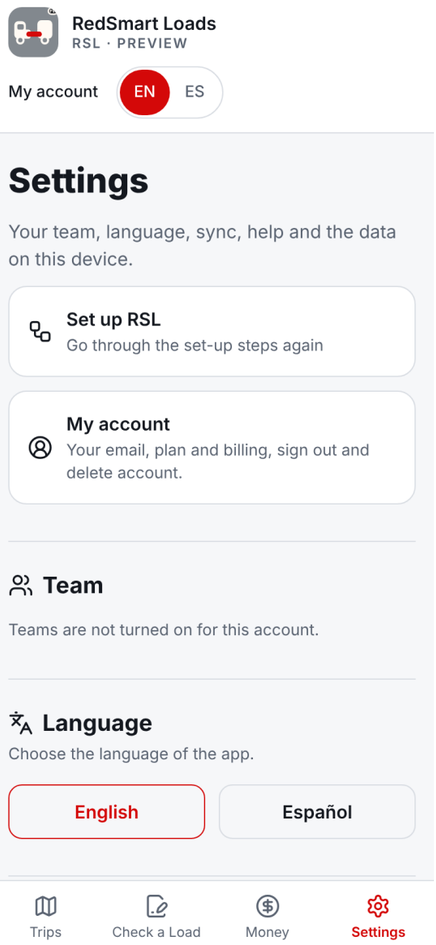

Language choice and drafts are stored in this browser.

1 · Open Settings

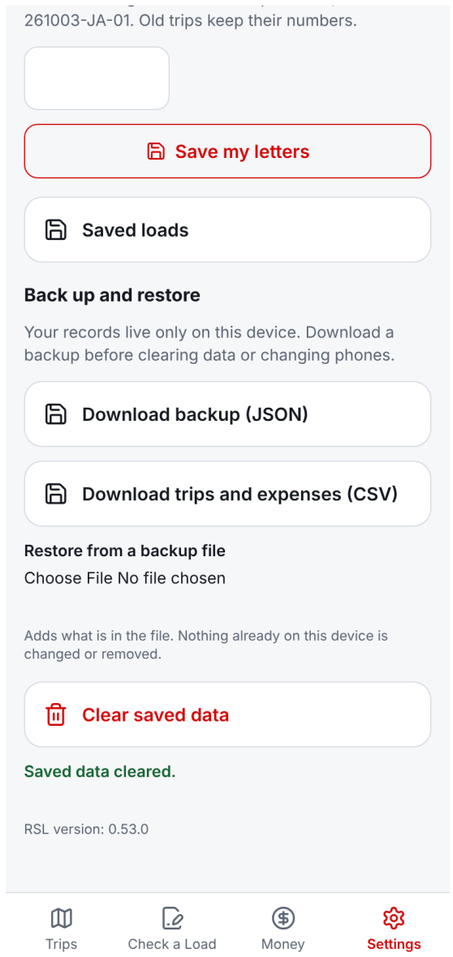

Use the Settings tab. Your fuel economy and maintenance reserve are on the truck profile (Open the truck profile): every load check uses them. Your letters for trip numbers can be changed here, under Your data on this device.

2 · Choose language

Select English or Español under Language or with the EN · ES switch in the header. The choice stays in this browser.

3 · Clear if intended

Choose Clear saved data and confirm. Profile and draft are removed; with sync off no server copy exists (with sync on, your account keeps your records).

A confirmation appears before anything is cleared. The RSL version appears in Settings.
